Let me know when you are ready for me to send the agenda forward.

Thanks.

Shane,

I already sent you a briefing memo. Enclosed is a draft agenda for the meeting on the 24th. After reading it this morning I realized I am asking too much, particularly for the H&H Modeling information. The agenda will give you an idea of what we will be talking about.

Subject: CRW

Hi Shane. I just forwarded you an invite for a meeting next week we are having with CRW. CRW is in Harrisburg – We are trying to get to submit an approvable LTCP. I'm going to ask Steve to send you an old briefing paper on this, and I'm going to ask that you schedule a ½ hour with him to just come up to speed on the case.

Essentially, I think this will be a good meeting to see how we work with CSO facilities and the technical nature of what we do. DOJ and OECA as well as the State is very involved in this case, but the meeting next week is technical only. Steve has some questions drafted that we are looking for some additional info - We are likely moving towards an enforcement strategy that focuses just on the first 10 years of projects to get to about 70% capture.

As I have mentioned before, we sometimes have contractor support as well, but there are some sensitivities, particularly with this case, in having our contractor involved in these meetings. So, he won't be there next week. With that said, I'm still learning where your expertise lies with WWT plants, but I'm continuing to try see where you may be able provide some assistance in the technical reviews & how to get your trained up. So, for this meeting next week, please try to meet with Steve in advance and just come prepared to be a set of listening ears to better understand the issues and we can go from there.
